DETAILED ACTION

Page 2

1. Amendment received on 11/03/2003 is entered. Claims 4, 12 and 13 are cancelled. Claims 1, 8, 9, 15 and 16 are amended. New Claims (17-40) are entered. Claims 1-3, 5-11 and 14-40 are pending in the application.

2. Replacement sheets (Fig. 21A and 21B) are approved. Objection to the drawings is withdrawn.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 4. Claims 8-11, 14, 16, 21-23 and 27-35 is rejected under 35 U.S.C. 102(e) as being anticipated by DiSalvo (6,040,967). DiSalvo disclosed a reset lockout for circuit interrupting device. The device includes a housing (Fig.1, Pos. 12), an electromechanical relay comprising a coil assembly (Fig.3, Pos 50), a group of contacts (Fig.8, Pos.30 and 74) that connect or disconnect a line to a load (read on a first circuit), a plunger

(Fig.2, Pos.52) and a banger (54) with banger dogs 56 and 58 which are used to set and reset the connection between input and output conductors (72 and 74). The device includes also a means for detecting a ground fault conditions. The ground fault detecting means include a test button (Fig.8, Pos 26), reset contacts (62, 63), resistors (R4, R4') and control circuitry to control the coil (50). A reset switch (30) when activated provides a simulated ground fault occurrence through resistance R4' connecting contacts (62 and 63). The relay is changing its position from open to close only in response to detection of the simulated ground fault that reads on, as the circuitry is operational.

Allowable Subject Matter

- 5. Claims 1-3, 5-7, 17-20 and 36-40 are allowed.
- 6. Claims 15 and 24-26 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is an Examiner's statement of reasons for the indication of allowable subject matter:

Application/Control Number: 09/876,156 Page 4

Art Unit: 2836

7. Independent Claims 1 and 36 are allowable because none of the prior art of record disclose a ground fault circuit interrupter that comprises a bistable latching relay in combination with the other claim limitations.

- 8. Claims 2,3,5-7 and 17-20 are dependent on allowable Claim 1 and therefore are allowable.
- 9. Claims 37-40 are dependent on allowable Claim 36 and therefore are allowable.
- 10. Claims 15 and 25 would be allowable because none of the prior art of record disclose a ground fault circuit interrupter that upon detection of the simulated ground fault (detection circuit is operational) change its state to open when previously first circuit was in close state in combination with the other claim limitations.
- 11. Claim 24 would be allowable because none of the prior art of record disclose a ground fault circuit interrupter that comprises a bistable latching relay in combination with the other claim limitations.
- 12. Claim 26 is dependent on Claim 25 and would be allowable if Claim 25 is allowed.

FINALITY OF THE ACTION

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS

ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Contact information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Boris Benenson whose telephone number is (703) 305-6917. After 1/28/2004 telephone number will be changed to (571) 272-2048. The examiner can normally be reached on M-F (8:20-6:00) First Friday Off.
